GENERAL INFORMATION

Overview

Project number

A02

Name of Experiment / Acronym / Number

Infinitival complements in the history of German

Involved persons

Ilaria De Cesare, Birte Pravemann

PI or responsible person (head of the study)

Ulrike Demske

Subject area

Historical linguistics, Corpus linguistics

Method / Type of data

Corpus study / Extraction of relevant hits (sentences) from existing corpora to be analysed for word order properties

Participants (of the study)

_

Short description (of the study)

The study consists in extracting sentences containing infinitival complements from corpora of written and spoken German in different historical stages of the language. The extracted data are annotated as to word order properties and further criteriarelevant for analysis.

Comments (optional)

Due to the different structure of the used corpora, search queries/methods for extraction of relevant hits differ across corpora. However, they all target the same structure, that is infinitival complements in subordinate clauses or main clauses with a ri

Data Management Requirements

Are there requirements regarding the data management from your scholarly / scientific community?

yes

If yes, what are the requirements?

- DFG Guidelines on the Handling of Research Data
- Handlungsempfehlungen zum Umgang mit Forschungsdaten University of Potsdam
- Technische und organisatorische Maßnahmen (TOM) gemäß Art. 32 Abs. 1 DSGVO

Financial Support

Who is funding the project?

DFG - Deutsche Forschungsgemeinschaft e.V. (German Research Foundation) - https://www.dfg.de/en/

In which funding line and / or which funding program is the project funded?

Collaborative Research Centre 1287 - Project number 317633507

DATASET INFORMATION

Data Origin

Is the dataset being created or re-used?

reused

If re-used, who created the dataset and under which address, PID or URL is the data set available?

-

Data Collection

When does data collection start? (approximately / tentatively)

September 2017

When does data collection end? (approximately / tentatively)

June 2019

Data Handling

Where is the dataset stored during the project?

- CRC file server
- Box.UP university cloud
- researcher's computer
- computer in the laboratory

.

If data is stored on lab or personal computers, please describe the backup strategy.

Raw data is stored on a CRC server which is regularly backed up. Analysis scripts and data are stored on laptop and additionally on an external hard drive.

Which file formats are used?

- Data: *.csv

- Analysis scripts: *.R

Which measures of quality assurance are taken for this dataset?

- When possible data is extracted by using automated search queries and subsequently manually checked.
- Annotation for analysis is always reviewed by a second person.

Data Analysis

When does data analysis start? (approximately / tentatively)

June 2019

When does data analysis end? (approximately / tentatively)

April 2020

Data Reuse

Which individuals, groups or institutions could be interested in re-using this dataset? What consequences does the reuse potential have for the provision of the data later?

The extracted data cannot be shared, because (i) the texts underly ing the corpora are subject to copyright restrictions and can only be exploited by using online corpus research tools, (ii) one corpus is only locally available and cannot be published or

LEGAL AND ETHICS

Personal Data

Does this dataset contain personal data?

no

If yes, are these data anonymised?

_

Property Rights

Does the project use and/or produce data that is protected by intellectual or industrial property rights?

yes

If yes, please explain which data protected by intellectual or industrial property rights?

_

PUBLICATION

Publishing or Sharing Data

Will this dataset be published or shared?

no

If yes, the principal investigator of the study ensured that the consent form / subject information sheets support publishing of the data?

_

If yes, under which terms of use or license will the dataset be published or shared?

-

If yes, when will the data be published?

-

If no, please explain why not. Please differentiate between legal and contractual reasons and voluntary restrictions.

The extracted data cannot be shared, because:

- the texts underlying the corpora are subject to copyright restrictions and can only be exploited by using online corpus research tools
- one corpus is only locally available and cannot be published or shared

STORAGE AND LONG-TERM PRESERVATION

Archive

Does this dataset have to be preserved for long-term?

yes

How long does the data need to be stored?

The DFG expects primary data that is the basis of a publication to be stored in the researcher's own institution or an appropriate nationwide infrastructure longterm (for at least 10 years).

What are the reasons this dataset must be preserved for the long-term?

- Use in a publication / Evidence of good scientific practice
- Reuse (if anonymizable data) in subsequent projects or by others
- Legal obligations
- Documentation because it is socially relevant
- Self-commitment
- Evidence of good scientific practice
- DFG requirements

Where will the data (including metadata, documentation, and relevant code) be stored or archived after the end of the project?

- CRC 1287 File-Server
- OSF
- Research Data Server from Project IN-FDM-BB (a.t.m. not available)
